

1. Homepage

✓ Increase the hero/header section

The client wrote:

Header - large

Meaning:

- Make the hero/banner larger and more visually impactful.
- The homepage should immediately communicate Cablelink's main value proposition.

✓ Standardize the CTA wording

Client specifically wrote:

Use the word **"Get Connected"** only.

Not **Get Today**

Not **Get Now**

Revision

Replace every CTA like:

✗ Get Now

✗ Apply Today

✗ Get Today

with

✓ Get Connected

✓ Refine homepage flow

The client's notes show:

Front

Get Started

Services

Get Connected

Application

Meaning:

The homepage should naturally guide users from:

Learn

Choose

Apply

instead of showing many disconnected buttons.

2. Services / Plans

✓ Refine the Services tab

Client note:

Refine the services tab, medyo naguguluhan sila

Meaning:

The services page feels confusing.

Recommendation:

Instead of showing every plan together

Organize into

- Residential Internet
- Cable TV
- Bundled Plans
- Enterprise

This matches their onboarding priorities.

✓ View Plans should be clearer

The client circled View Plans

Meaning:

Users should quickly understand

- what plans exist
- differences
- pricing
- where to apply

3. Get Connected / Application

This is one of the biggest discussions.

✓ "Get Connected" should lead directly to the Application page**Client note:**

Get Connected → Application Menu

Meaning:

Clicking Get Connected should immediately begin the application process.

✓ Improve the Application Form

Client notes mention

- add checkbox
- add attachment
- proof of billing

Meaning:

The application form should include

- Required consent checkbox
- File upload
- Proof of Billing
- (possibly Proof of Address)

✓ Connect the form to their MIS**Client note:**

connected to their MIS (CRM)

Meaning:

Once submitted, don't just send an email.

Instead:

Application

↓

Internal MIS

↓

Staff Review

↓

Installation scheduling

Backend requirement.

4. Coverage Area

This appears several times.

Client notes mention:

Coverage Area

and

Facilities Coverage Area.

✓ Move Coverage Checking into the Get Connected.

Instead of

Homepage

↓

Coverage

↓

Application

They seem to prefer

Get Connected

↓

Check Service Availability

↓

Continue Application

5. Contact Us

Very consistent between both notebooks.

✓ "Need Help Choosing?"

Current

Need Help?

↓

Talk to Us

Client wants

Need Help Choosing?

↓

Directly

- Messenger
- Viber
- Contact Us

No extra page.

✓ **Contact icons only**

Client circled

icon only

Meaning

Instead of listing

Facebook

Messenger

Instagram

Email

Show

only platform icons.

Clicking opens the corresponding platform.

Cleaner UI.

✓ **Add Contact Us button in Header**

Client wrote:

add contact us button in the header

Meaning:

Header should contain **Contact Us** while detailed contact information stays in the footer.

6. Footer

This appears several times.

✓ **Footer should contain detailed information**

Include

- Company information
- Contact details
- Social media
- Platform links

instead of only copyright.

✓ **Add About Us in the footer**

This one is **confirmed from your notes**, not the client's notebook.

My notes clearly state add About Us sa footer.

The client's notebook **does not clearly say to put About Us in the header.**

So the safer revision is Add About Us to the footer.

7. Support Section

Very clear.

Client wrote:

Support

Include

- FAQ
- Existing Subscribers
- Advisories
- Payment Options
- Billing Support

This also matches the FAQ document they prepared.

✓ Add Support in the Header

Instead of hiding support pages, Support should become a primary navigation item.

8. Billing Support

Client specifically wrote Billing Support

Meaning:

Separate Billing Support from General Contact.

9. Payment Facilities

Several revisions.

✓ Remove Coverage Area from Payment Facilities

Client note:

Payment Facilities, remove coverage area here

Meaning:

Payment page should only discuss

- payment methods
- payment partners
- payment instructions

✓ Add Auto Debit Form

Client note

fillable form

Auto Debit

Meaning

Instead of downloading a PDF, users can submit Auto Debit online.

✓ Add Search

Client drew

search icon

Meaning:

Users can search payment centers, payment options etc.

10. Privacy Policy

Very clear.

Client wrote:

Privacy Notice

Popup

↓

Privacy Notice in Footer

Meaning

Popup remains,

Full Privacy Policy stays in footer.

Also

Need Privacy content from Cablelink.

11. Chatbot

Add Chatbox

Meaning:

Website chatbot.

12. Service Advisories

Interesting change.

Client wrote:

Removed advisories

Push advisories on Twitter (X)

Meaning:

Homepage shouldn't be filled with advisories.

Instead, Use X (Twitter) or a dedicated Advisories page.

13. Monthly Ads

Prepare 3 Ads

Sept

Oct

Nov

Additional: Privacy Policy and Website Pop-Up:

Website Entry Pop-Up

- Add a pop-up that appears when users first enter the website.
- The pop-up should include a short Privacy Notice message.
- Add a button or link that directs users to the complete **Privacy Notice or Privacy Policy in the footer.**
- The same pop-up should also invite users to follow or like Cablelink's official Facebook page.
- Suggested Facebook message:
 - **Like and follow Cablelink on Facebook for the latest updates, promos, and service advisories.**
- Include a direct button leading to the official Facebook page.
- The pop-up should have a clear close button so users can continue browsing the website.

Suggested Pop-Up Structure

Stay Updated with Cablelink

By continuing to browse this website, you acknowledge Cablelink's Privacy Notice.

Buttons:

- View Privacy Notice
- Like Us on Facebook
- Continue to Website

The **View Privacy Notice** button should scroll or redirect to the Privacy Notice link in the footer.

Final Priority Checklist for Development

Homepage

- Increase hero/header size.
- Standardize all CTAs to **Get Connected**.
- Improve the homepage flow from Services → Get Connected → Application.

Services & Plans

- Refine the Services tab because users find it confusing.
- Better organize plans into clear categories.
- Make View Plans easier to understand.

Application

- Get Connected should go directly to the application.
- Add a consent checkbox before submission.
- Allow attachment uploads (proof of billing and related documents).
- Integrate submitted applications with the client's MIS/CRM.

Contact & Support

- Add a Contact Us button to the header.
- Add a Support menu with:
 - FAQ
 - Existing Subscribers
 - Advisories
 - Payment Options
 - Billing Support
- Add a website chatbot.
- Show contact platforms as icons only.
- Direct "Need Help Choosing?" users straight to Viber, Messenger, or Contact Us.

Footer

- Expand the footer with company information, contact details, and social links.
- Add an About Us link or section in the footer.

Payment Facilities

- Remove Coverage Area information from the Payment Facilities page.
- Add a searchable list of payment methods/facilities.
- Add an online Auto Debit application form.

Privacy

- Keep the Privacy Notice as a popup.
- Link to the full Privacy Policy in the footer.
- Obtain the finalized Privacy Policy content from Cablelink.

Other

- Move service advisories away from the homepage and publish them through X (Twitter) or a dedicated Advisories page.
- Prepare three monthly ad campaigns (September, October, and November).
